Test policies and materials, including but not limited to tests, item types, and item formats, are subject to change at the discretion of the Massachusetts Department of Elementary and Secondary Education.*
INTRODUCTION

This document is a printable version of the Massachusetts Tests for Educator Licensure® (MTEL®) General Curriculum (03) Online Practice Test.

The MTEL General Curriculum test consists of a multi-subject subtest and a mathematics subtest. To pass the General Curriculum test, you must pass both the multi-subject and mathematics subtests.

This practice test for the General Curriculum mathematics subtest is a sample test consisting of 45 multiple-choice questions and 1 open-response item assignment.

To assist you in recording and evaluating your responses on the practice test, a Multiple-Choice Answer Sheet, an Answer Key Worksheet, and an Evaluation Chart by test objective are included for the multiple-choice questions. A blank Response Sheet, Evaluation Information, and Sample Responses and Analyses, as well as a Scoring Rubric, are included for the open-response item. Lastly, there is a Practice Test Score Calculation Worksheet.

PURPOSE OF THE PRACTICE TEST

The practice test is designed to provide an additional resource to help you effectively prepare for the MTEL General Curriculum (03) test. The primary purpose of the practice test is to help you become familiar with the structure and content of the test. It is also intended to help you identify areas in which to focus your studies. Education faculty and administrators of teacher preparation programs may also find this practice test useful as they help students prepare for the official test.

TAKING THE PRACTICE TEST

In order to maximize the benefits of the practice test, it is recommended that you take this test under conditions similar to the conditions under which the official MTEL tests are administered. Try to take the practice test in a quiet atmosphere with few interruptions and limit yourself to the four-hour time period* allotted for the official test administration. You will find your results to be more useful if you refer to the answer key only after you have completed the practice test.

INCORPORATING THE PRACTICE TEST IN YOUR STUDY PLAN

Although the primary means of preparing for the MTEL is your college education, adequate preparation prior to taking or retaking the MTEL test is strongly recommended. How much preparation and study you need depends on how comfortable and knowledgeable you are with the content of the test.

The first step in preparing to take the MTEL is to identify what information the test will address by reviewing the objectives for your field. A complete, up-to-date list of the Test Objectives is included in the Test Information Booklet (available summer 2008) for each test field. The test objectives are the core of the testing program and a helpful study tool. Before taking or retaking the official test, focus your study time on those objectives for which you wish to strengthen your knowledge.

* For the Communication and Literacy Skills and General Curriculum tests, candidates may take one or both subtests during the four-hour session.
This practice test may be used as one indicator of potential strengths and weaknesses in your knowledge of the content on the official test. However, because of potential differences in format and difficulty between the practice test and an official MTEL General Curriculum (03) test, it is not possible to predict precisely how you might score on an official MTEL General Curriculum (03) test. Keep in mind that the subareas for which the test weighting is greatest will receive emphasis on this test. Refer to the Test Information Booklet for additional information about how to prepare for the test.
GENERAL TEST DIRECTIONS

This practice test consists of two subtests: multi-subject (booklet 1) and mathematics (booklet 2). Each multiple-choice question on the practice test has four answer choices. Read each question carefully and choose the ONE best answer. Record each answer on the answer sheet provided.

Sample Question: 1. What is the capital of Massachusetts?
   A. Worcester
   B. New Bedford
   C. Boston
   D. Springfield

The correct answer to this question is C. You would indicate that on the answer sheet.

The open-response item assignment on this practice test requires a written response. Directions for the open-response item assignment appear immediately before the assignment.

You may work on the multiple-choice questions and open-response item assignment in any order that you choose. You may wish to monitor how long it takes you to complete the practice test. When taking the actual MTEL General Curriculum (03) test, you will have one four-hour test session in which to complete the test.

Please note that graphic representations included on the test may not be drawn to scale.

MULTIPLE-CHOICE QUESTIONS

1. In the number 2010, the value represented by the digit 1 is what fraction of the value represented by the digit 2?

A. \( \frac{1}{2000} \)
B. \( \frac{1}{200} \)
C. \( \frac{1}{20} \)
D. \( \frac{1}{2} \)

2. If \( P \) is a positive integer, which of the following must also be a positive integer?

A. \( 1 - P \)
B. \( \frac{1}{P} \)
C. \( \sqrt{P} \)
D. \( P^2 \)
3. According to an article in a financial journal, a certain company earned 3.85 million dollars last year. Based on this report of the company’s yearly earnings, a person reading the article estimates that the company earned an average of approximately 30 thousand dollars per month. Which of the following statements best describes the reasonableness of this estimate for the company’s average monthly earnings?

A. The estimate is too low by a factor of 100.
B. The estimate is too low by a factor of 10.
C. The estimate is too high by a factor of 10.
D. The estimate is too high by a factor of 100.

4. The mean distance from the earth to the sun is approximately 93 million miles, or one astronomical unit (AU). The mean distance from Neptune to the sun is approximately $2.794 \times 10^9$ miles. What is the approximate mean distance from Neptune to the sun in astronomical units?

A. 30 AU
B. 300 AU
C. 3,000 AU
D. 30,000 AU
5. **Use the expression below to answer the question that follows.**

\[
\frac{(32,629)(484)}{306,751}
\]

Which of the following is the best estimate of the value of the expression above?

A. 40  
B. 50  
C. 400  
D. 500  

6. **Use the diagram below to answer the question that follows.**

![Diagram of a rectangle with dimensions 2" by 4"]

The measurements in the diagram above are shown rounded to the nearest whole number. Which of the following is a possible value of \( A \), the area of the rectangle?

A. 5.0 square inches  
B. 5.5 square inches  
C. 11.5 square inches  
D. 12.0 square inches
7. Use the table below to answer the question that follows.

<table>
<thead>
<tr>
<th>Store</th>
<th>Discount from Manufacturer's Recommended Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$4 off the price of each game</td>
</tr>
<tr>
<td>2</td>
<td>30% discount on each game</td>
</tr>
<tr>
<td>3</td>
<td>( \frac{1}{3} ) off the price of two games</td>
</tr>
<tr>
<td>4</td>
<td>buy one game and get the second at half price</td>
</tr>
</tbody>
</table>

Samantha wants to buy two computer games, each of which has a manufacturer's recommended price of $20. She checks four different stores and finds the prices of the games discounted as shown in the table above. At which store will Samantha be able to buy the games for the least amount of money?

A. store 1
B. store 2
C. store 3
D. store 4
8. **Use the procedure below to answer the question that follows.**

\[
\begin{align*}
    n &= 0.636363... \\
    100n &= 63.636363... \\
    100n &= 63.636363... \\
    -n &= -0.636363... \\
    99n &= 63
\end{align*}
\]

The procedure above shows how to convert a repeating decimal to a fraction. If 0.12561256... is a decimal with four repeating digits, which of the following represents this decimal as a fraction?

A. \( \frac{1256}{99} \)  
B. \( \frac{1256}{999} \)  
C. \( \frac{1256}{9999} \)  
D. \( \frac{1256}{99999} \)

9. **Use the problem below to answer the question that follows.**

Given that 100 milliliters is equal to approximately 0.4 cup, 205 milliliters is equal to approximately how many cups?

Which of the following expressions models the solution to the problem above?

A. \((100 - 0.4)(205)\)  
B. \(105\% \text{ of } 0.4\)  
C. \((205 - 100)(0.4)\)  
D. \(205\% \text{ of } 0.4\)
10. **Use the number line below to answer the question that follows.**

![Number Line Diagram]

What number is represented by point \( P \) on the number line above?

A. 0.0032  
B. 0.00325  
C. 0.0034  
D. 0.00345

11. A book distributor is trying to divide an order of textbooks into equally sized groups for shipping in cartons. The textbooks can be divided into groups of 12, groups of 15, or groups of 18, with no books left over. Which of the following inequalities is satisfied if \( N \) is the smallest possible total number of textbooks?

A. \( 100 \leq N < 150 \)  
B. \( 150 \leq N < 200 \)  
C. \( 200 \leq N < 250 \)  
D. \( 250 \leq N < 300 \)
12. The prime factorization of a natural number \( n \) can be written as \( n = pr^2 \) where \( p \) and \( r \) are distinct prime numbers. How many factors does \( n \) have, including 1 and itself?

A. 3

B. 4

C. 5

D. 6

13. Given \( pn = 150 \) where \( p \) is a prime number and \( n \) is a natural number, which of the following must be true?

A. \( p \) is a factor of either 10 or 15.

B. 10 is a factor of \( n \).

C. \( n \) is a factor of either 10 or 15.

D. 15 is a factor of \( n \).
14. The greatest common factor of \( n \) and 540 is 36. Which of the following could be the prime factorization of \( n \)?

A. \( 2 \cdot 3^2 \)
B. \( 2^2 \cdot 3^3 \)
C. \( 2^4 \cdot 3^2 \cdot 7 \)
D. \( 2^4 \cdot 3^5 \cdot 5 \)

15. A shipping container measures 8 feet by 12 feet by 24 feet. The container is to be filled with identical cube-shaped boxes, each having sides measuring a whole number of feet. Which of the following expressions represents the smallest number of such identical boxes that could be packed into the container with no empty space remaining?

A. \( \frac{8}{4} + \frac{12}{4} + \frac{24}{4} \)
B. \( \frac{8}{4} \cdot \frac{12}{4} \cdot \frac{24}{4} \)
C. \( 8 \cdot 12 \cdot 24 \)
D. \( 8 + 12 + 24 \)
16. **Use the diagram below to answer the question that follows.**

The diagram above could best be used to derive a formula for which of the following quantities?

A. the sum of the first $n$ consecutive odd integers

B. the product of the first $n$ consecutive even integers

C. the sum of the first $n$ consecutive even integers

D. the product of the first $n$ consecutive odd integers
17. Use the diagram below to answer the question that follows.

The diagram above demonstrates how the lattice multiplication algorithm is used to multiply 231 by 25 to get the product 5775. What value does the circled digit represent?

A. 1
B. 10
C. 100
D. 1000
18. Use the samples of a student's work below to answer the question that follows.

\[
\frac{9}{16} + \frac{3}{4} = \frac{9 + 3}{16 + 4} = \frac{3}{4}
\]

\[
\frac{15}{8} + \frac{5}{4} = \frac{15 + 5}{8 + 4} = \frac{3}{2}
\]

\[
\frac{5}{12} + \frac{5}{3} = \frac{5 + 5}{12 + 3} = \frac{1}{4}
\]

Which of the following statements best describes the mathematical validity of the algorithm that the student appears to be using?

A. It is not valid for any rational numbers.
B. It is valid only when all numerators and denominators are integers.
C. It is valid only when all numerators and denominators are positive integers.
D. It is valid for all rational numbers.

19. Use the inequality below to answer the question that follows.

\[
3 \div x > 4 \div x
\]

Which of the following inequalities describes all possible values of \(x\)?

A. \(x < -1\)
B. \(x < 0\)
C. \(-1 < x < 0\)
D. \(0 < x < 1\)
20. The expression \((5^{-8} \cdot 7^{-9})\) is equal to which of the following?

A. \(\frac{1}{5(35)^8}\)

B. \(\frac{1}{7(35)^8}\)

C. \(\frac{5}{(35)^8}\)

D. \(\frac{7}{(35)^8}\)

21. Use the diagram below to answer the question that follows.

Which of the following algebraic equations could best be used to explain why, for any three-by-three cross like the one shown above, the sum of the numbers in the vertical rectangle is equal to the sum of the numbers in the horizontal rectangle?

A. \(9x + 14x + 19x = 13x + 14x + 15x\)

B. \(5[x + (x + 1) + (x + 2)] = 5x + (5x + 5) + (5x + 10)\)

C. \(x + 9 + 14 + 19 = x + 13 + 14 + 15\)

D. \((x – 1) + x + (x + 1) = (x – 5) + x + (x + 5)\)
22. **Use the problem below to answer the question that follows.**

A landscaper bought some decorative cement blocks from a landscaping supplier. The supplier charged 5% sales tax and the total came to $315. Without the tax, the landscaper could have bought 6 more blocks for the same total cost. How many blocks did the landscaper buy?

If \( p \) represents the price of one block, in which of the following equations does \( x \) represent the answer to the problem above?

A. \( 0.95px = p(x + 6) \)
B. \( 1.05p(x + 6) = 315 \)
C. \( 1.05px = p(x + 6) \)
D. \( 0.95p(x + 6) = 315 \)

23. A store that sells handcrafted items takes $3.00 per item plus 40% of the sale price for each item sold. The rest of the money from item sales goes to the craftsperson. All items sold cost $5.00 or more. If \( p \) represents the sale price of one item, which of the following expressions represents the amount of money the craftsperson gets for each item sold?

A. \( \frac{2}{5}p + 3 \)
B. \( \frac{2}{5}p - 3 \)
C. \( \frac{3}{5}p + 3 \)
D. \( \frac{3}{5}p - 3 \)
24. **Use the solution procedure below to answer the question that follows.**

\[-3x + 25 = 4\]
\[-3x + 25 - 25 = 4 - 25 = -21 \div (-3) = 7\]
\[x = 7\]

Which of the following is a major flaw in the procedure shown above?

A. The concept of the opposite of a number is confused with subtraction.

B. The equal sign is used to connect expressions that are not equal.

C. The solution contains an error in the arithmetic of signed numbers.

D. The order of operations between subtraction and division is reversed.

25. **Use the diagram below to answer the question that follows.**

![Figure 1](image1.png) ![Figure 2](image2.png) ![Figure 3](image3.png) ![Figure 4](image4.png)

If the pattern continues, how many more small squares are in figure 100 than are in figure 99?

A. 98

B. 99

C. 100

D. 101
26. **Use the table below to answer the question that follows.**

<table>
<thead>
<tr>
<th></th>
<th>4</th>
<th>3</th>
<th>2</th>
<th>1</th>
<th>0</th>
</tr>
</thead>
<tbody>
<tr>
<td>x</td>
<td>20</td>

<td>34</td>
<td>29</td>
<td>24</td>
</tr>
<tr>
<td></td>
<td>52</td>
<td>47</td>
<td>42</td>
<td>37</td>
<td>32</td>
</tr>
</tbody>
</table>

Each number in the table above represents a value of \( w \) that is determined by the values of integers \( x \) and \( y \). For example, when \( x = 2 \) and \( y = 1 \), \( w = 21 \). If the pattern continues, what is the value of \( w \) when \( x = 20 \) and \( y = 8 \)?

A. 164  
B. 200  
C. 208  
D. 820
27. The function \( r(x) \) gives the remainder when a whole number \( x \) is divided by 10. Which of the following graphs represents \( r(x) \)?

A. 

```
\begin{array}{c}
\text{r}(x) \\
\text{10} \\
\text{8} \\
\text{6} \\
\text{4} \\
\text{2} \\
\text{0} \\
\end{array}
```

B. 

```
\begin{array}{c}
\text{r}(x) \\
\text{10} \\
\text{8} \\
\text{6} \\
\text{4} \\
\text{2} \\
\text{0} \\
\end{array}
```

C. 

```
\begin{array}{c}
\text{r}(x) \\
\text{10} \\
\text{8} \\
\text{6} \\
\text{4} \\
\text{2} \\
\text{0} \\
\end{array}
```

D. 

```
\begin{array}{c}
\text{r}(x) \\
\text{10} \\
\text{8} \\
\text{6} \\
\text{4} \\
\text{2} \\
\text{0} \\
\end{array}
```
28. Four pumps begin draining a 5400-gallon pool. At the same time, two pumps begin draining a 4000-gallon pool. Assuming that all of the pumps drain at the same rate, how many gallons are left in the smaller pool when the larger pool is finished being drained?

A. 1300 gallons  
B. 1350 gallons  
C. 2700 gallons  
D. 2750 gallons

29. Use the graph below to answer the question that follows.

The graph above shows the distance \(d\) in miles and the time \(t\) in minutes for six bus routes around a city. Which of the following equations best models the relationship between \(d\) and \(t\) for these bus routes?

A. \(t = d\)  
B. \(t = d + 10\)  
C. \(t = 2d\)  
D. \(t = 2d + 10\)
30. Use the graph below to answer the question that follows.

The graph above represents the equation \( Wx + 4y = -12 \). What is the value of \( W \)?

A. -6
B. -3
C. 3
D. 5
31. Use the problem below to answer the question that follows.

A red car and a blue car compete in two 100-mile races. In the first race, both cars leave the starting line at the same time. When the red car crosses the finish line, the blue car has 10 miles left to go. In the second race, both cars start at the same time, but while the blue car begins at the starting line, the red car begins 10 miles behind the starting line.

Assuming that each car’s average speed does not change, how far has the blue car traveled in the second race when the red car reaches the finish line?

Which of the following proportions could be used to solve the problem above?

A. \( \frac{100}{90} = \frac{110}{x} \)

B. \( \frac{100}{10} = \frac{110}{x} \)

C. \( \frac{100}{90} = \frac{90}{x} \)

D. \( \frac{100}{10} = \frac{90}{x} \)
32. Use the diagram below to answer the question that follows.

![Diagram of a circle divided into sections]

The diagram above is used to describe the relationship between the circumference \( c \), the radius \( r \), and the area \( A \) of a circle. Assuming that the circle is divided into enough sections so that the figure on the right approximates a rectangle, which of the following relationships is demonstrated?

A. \( A = \frac{1}{2} cr \)
B. \( A = cr \)
C. \( A = \frac{3}{2} cr \)
D. \( A = 2cr \)

33. A pretzel company sells pretzels in a cylindrical container with a radius of 10 cm and a height of 30 cm. The company's packaging designers are considering switching to a new cylindrical container with a radius of 20 cm and a height of 15 cm. How does the volume of the proposed new container compare to the volume of the old container?

A. The volume of the new container is 125 cm\(^3\) less than the volume of the old container.
B. The volume of the new container is 5 cm\(^3\) less than the volume of the old container.
C. The volume of the new container is equal to the volume of the old container.
D. The volume of the new container is twice the volume of the old container.
34. A fuel tank was approximately $\frac{1}{8}$ full. After adding $50$ worth of fuel, the tank was $\frac{3}{4}$ full. If the fuel costs $p$ dollars per gallon, approximately how many gallons does the tank hold when full?

A. $\frac{80}{p}$ gallons  
B. $\frac{50}{p}$ gallons  
C. $50p$ gallons  
D. $80p$ gallons

35. A homeowner is planning to use carpet tiles to cover the floor of a room measuring 9 feet by 10 feet 8 inches. If the carpet tiles are 8 inches wide and 1 foot long and there are no gaps between the tiles as they are placed on the floor, how many carpet tiles will the homeowner need to cover the floor of the room?

A. 100  
B. 135  
C. 144  
D. 150
36. Use the diagram below to answer the question that follows.

A gift box has dimensions $x$ by $y$ by $z$. A decorative ribbon is wrapped across the diagonals of the box as shown above. Which of the following expressions represents the approximate total length of the ribbon?

A. $2(\sqrt{xy} + \sqrt{yz})$

B. $2(\sqrt{xy} + \sqrt{yz} + \sqrt{zx})$

C. $2(\sqrt{x^2 + y^2} + \sqrt{y^2 + z^2})$

D. $2(\sqrt{x^2 + y^2} + \sqrt{y^2 + z^2} + \sqrt{z^2 + x^2})$
37. **Use the graph below to answer the question that follows.**

If the image of a pointing hand in the graph above is rotated 180° about the origin and then reflected across the x-axis, which of the following graphs will result?

A. ![Graph A]

B. ![Graph B]

C. ![Graph C]

D. ![Graph D]
38. Which of the following nets can be folded to form a square pyramid?

A. 

B. 

C. 

D. 

39. **Use the figure below to answer the question that follows.**

![Equilateral Triangle ABC](image)

If equilateral triangle \(ABC\) above represents one of two congruent halves of a figure that has \(AB\) as a line of symmetry, then the entire figure is a:

A. triangle.
B. rectangle.
C. prism.
D. rhombus.

40. **Use the diagram below to answer the question that follows.**

![Diagram with angles](image)

Three straight lines intersect to form a triangle, as shown above. What is the measure of angle \(x\)?

A. 115°
B. 120°
C. 125°
D. 130°
Two 6-sided number cubes are rolled simultaneously 10 times. The sums are recorded in the histogram shown above. Which of the following statements can be inferred from the histogram?

A. The mean is less than the median by $\frac{1}{10}$.

B. The mean is greater than the median by $\frac{1}{10}$.

C. The mean is less than the median by $\frac{1}{2}$.

D. The mean is greater than the median by $\frac{1}{2}$. 
42. **Use the graph below to answer the question that follows.**

The graph above shows the distribution of scores on a test with possible scores of 10, 20, 30, 40, 50, and 60. The minimum passing score was 40. 20 girls and 20 boys took the test. The percentage of girls passing the test was how much greater than the percentage of boys passing the test?

A. 25%
B. 20%
C. 15%
D. 10%
43. **Use the table below to answer the question that follows.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Vanilla</th>
<th>Chocolate</th>
<th>Strawberry</th>
</tr>
</thead>
<tbody>
<tr>
<td>10–19</td>
<td>7</td>
<td>30</td>
<td>15</td>
</tr>
<tr>
<td>20–29</td>
<td>10</td>
<td>16</td>
<td>14</td>
</tr>
<tr>
<td>30–39</td>
<td>8</td>
<td>14</td>
<td>12</td>
</tr>
<tr>
<td>40–49</td>
<td>9</td>
<td>17</td>
<td>9</td>
</tr>
</tbody>
</table>

A marketing company conducted a survey to determine milk shake flavor preferences among five different age groups. Based on the data in the table, what is the probability that a randomly chosen 35-year-old customer will prefer a strawberry-flavored milk shake?

A. \( \frac{1}{7} \)

B. \( \frac{1}{6} \)

C. \( \frac{6}{25} \)

D. \( \frac{6}{17} \)
44. A child has a set of blocks, of which 4 are square, 5 are round, and 6 are triangular. The child randomly picks a block from the set and gives it to his sister. The child then randomly picks one more block. What is the probability that the first block was round and the second block was triangular?

A. \( \frac{1}{9} \)

B. \( \frac{2}{15} \)

C. \( \frac{1}{7} \)

D. \( \frac{11}{15} \)

45. Use the spinner below to answer the question that follows.

The host of a party tells her guests that every time the spinner above lands on the section labeled "Fruit Basket," a guest will win a large basket of fruit. If the 180 guests at the party each spin the spinner once, what is the best estimate of the number of fruit baskets that the host will be giving away?

A. 7

B. 14

C. 36

D. 72
DIRECTIONS FOR THE OPEN-RESPONSE ITEM ASSIGNMENT

This section of the test consists of an open-response item assignment that appears on the following page. You will be asked to prepare a written response of approximately 1–2 pages for the assignment. You should use your time to plan, write, review, and edit your response for the assignment.

Read the topic and directions for the assignment carefully before you begin to work. Think about how you will organize your response.

As a whole, your response to the assignment must demonstrate an understanding of the knowledge of the field. In your response to the assignment, you are expected to demonstrate the depth of your understanding of the subject area by applying your knowledge rather than by merely reciting factual information.

Your response to the assignment will be evaluated based on the following criteria.

- **PURPOSE**: the extent to which the response achieves the purpose of the assignment
- **SUBJECT KNOWLEDGE**: appropriateness and accuracy in the application of subject knowledge
- **SUPPORT**: quality and relevance of supporting evidence
- **RATIONALE**: soundness of argument and degree of understanding of the subject area

The open-response item assignment is intended to assess subject knowledge. Your response must be communicated clearly enough to permit valid judgment of the evaluation criteria by scorers. Your response should be written for an audience of educators in this field. The final version of your response should conform to the conventions of edited American English. Your response should be your original work, written in your own words, and not copied or paraphrased from some other work.

Be sure to write about the assigned topic. Please write legibly. You may not use any reference materials during the test. Remember to review your work and make any changes you think will improve your response.

Write or print your response in the space provided following the assignment.
Approximately what fraction of the entire figure shown above is enclosed by the semicircle? (use $\pi = 3.14$)

Student response:

- rectangle = $6 \times 3 = 18$
- triangle = $\frac{1}{2} \times 6 \times 4 = 12$
- semicircle = $\frac{1}{2} \times 2 \times \pi \times radius = \frac{3\pi}{2}$

Answer = $\frac{93.12}{123.12}$ or about $\frac{90}{120} = \frac{3}{4}$
Use your knowledge of mathematics to create a response in which you analyze the elementary school student's work and provide an alternative solution to the problem. In your response, you should:

• correct any errors or misconceptions evident in the elementary school student's work and explain why the response is not mathematically sound (be sure to provide a correct solution, show your work, and explain your reasoning); and

• solve the problem using an alternative method that could enhance the elementary school student's conceptual understanding of ratios and decimal multiplication in the context of the problem.
PRACTICE TEST RESULTS
PRACTICE TEST RESULTS OVERVIEW

The practice test provides valuable information regarding your preparedness for the MTEL General Curriculum (03): Mathematics subtest. In this section, you will find information and tools to help you determine your preparedness on the various sections of the test.

Multiple-Choice Questions

A Multiple-Choice Question Answer Key Worksheet is provided to assist you in evaluating your multiple-choice responses. The worksheet contains five columns. The first column indicates the multiple-choice question number, the second column indicates the objective to which the test question was written, and the third column indicates the correct response. The remaining columns are for your use in calculating the number of multiple-choice questions you answered correctly or incorrectly.

An Evaluation Chart for the multiple-choice questions is also provided to help you assess which content covered by the test objectives may require additional study.

Open-Response Item

Evaluation Information, Sample Responses and Analyses, as well as a Scoring Rubric are provided for this item. You may wish to refer to this information when evaluating your practice test response.

Total Test

Practice Test Score Calculation information is provided to help you estimate your score on the practice test. Although you cannot use this practice test to precisely predict how you might score on an official MTEL General Curriculum: Mathematics subtest, you may be able to determine your degree of readiness to take an MTEL test at an operational administration. No passing score has been determined for the practice test.

Subarea VIII (Objectives 0025–0026) Total _____ /5
OPEN-RESPONSE ITEM EVALUATION INFORMATION

How Open-Response Items Are Scored

Open-response items are scored through a process called focused holistic scoring. Scorers judge the overall effectiveness of the response rather than individual aspects considered in isolation. Scorers' judgments are based on the quality of the response, not on length or neatness. Responses must be long enough to cover the topic adequately and scorers must be able to read what is written.

How to Evaluate Your Practice Essay

On the following pages, you will find two "strong" and two "weak" sample responses. PLEASE DO NOT REVIEW THE SAMPLE RESPONSES UNTIL AFTER YOU HAVE WRITTEN YOUR OWN RESPONSE. When you do review the two "strong" and "weak" sample responses and analyses included here, please note the following points:

✓ For the purposes of the practice test, responses are identified as "strong" or "weak" rather than given a score point of 1–4.

✓ The responses identified as "strong" may contain flaws; however, these responses do demonstrate the performance characteristics of a "strong response."

✓ The two "strong" responses demonstrate the examinees' appropriate understanding and application of the subject matter knowledge. However, these responses do not necessarily reflect the full range of "correct answers" that would demonstrate an understanding of the subject matter.

✓ The "Analysis" accompanying each "strong" and "weak" response discusses the main attributes of the response, but does not identify all flaws or strengths that may be present.

Compare your practice response to the Sample Responses to determine whether your response is more similar to the strong or weak responses. Also review the Analyses on those pages and the Scoring Rubric to help you better understand the characteristics of strong and weak essays. This evaluation will help you identify specific problems or weaknesses in your practice response. Further information on scoring can be found in the Test Information Booklet and Faculty Guide at www.mtel.nesinc.com and at www.doe.mass.edu/mtel; select "FAQ," then "After the Test."

SCORING RUBRIC FOR SUBJECT TESTS

Performance Characteristics:

<table>
<thead>
<tr>
<th>Purpose</th>
<th>The extent to which the response achieves the purpose of the assignment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject Matter Knowledge</td>
<td>Accuracy and appropriateness in the application of subject matter knowledge.</td>
</tr>
<tr>
<td>Support</td>
<td>Quality and relevance of supporting details.</td>
</tr>
<tr>
<td>Rationale</td>
<td>Soundness of argument and degree of understanding of the subject matter.</td>
</tr>
</tbody>
</table>

Scoring Scale:

<table>
<thead>
<tr>
<th>Score Point</th>
<th>Score Point Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>The &quot;4&quot; response reflects a thorough knowledge and understanding of the subject matter.</td>
</tr>
<tr>
<td></td>
<td>• The purpose of the assignment is fully achieved.</td>
</tr>
<tr>
<td></td>
<td>• There is a substantial, accurate, and appropriate application of subject matter knowledge.</td>
</tr>
<tr>
<td></td>
<td>• The supporting evidence is sound; there are high-quality, relevant examples.</td>
</tr>
<tr>
<td></td>
<td>• The response reflects an ably reasoned, comprehensive understanding of the topic.</td>
</tr>
<tr>
<td>3</td>
<td>The &quot;3&quot; response reflects an adequate knowledge and understanding of the subject matter.</td>
</tr>
<tr>
<td></td>
<td>• The purpose of the assignment is largely achieved.</td>
</tr>
<tr>
<td></td>
<td>• There is a generally accurate and appropriate application of subject matter knowledge.</td>
</tr>
<tr>
<td></td>
<td>• The supporting evidence is adequate; there are some acceptable, relevant examples.</td>
</tr>
<tr>
<td></td>
<td>• The response reflects an adequately reasoned understanding of the topic.</td>
</tr>
<tr>
<td>2</td>
<td>The &quot;2&quot; response reflects a limited knowledge and understanding of the subject matter.</td>
</tr>
<tr>
<td></td>
<td>• The purpose of the assignment is partially achieved.</td>
</tr>
<tr>
<td></td>
<td>• There is a limited, possibly inaccurate or inappropriate, application of subject matter knowledge.</td>
</tr>
<tr>
<td></td>
<td>• The supporting evidence is limited; there are few relevant examples.</td>
</tr>
<tr>
<td></td>
<td>• The response reflects a limited, poorly reasoned understanding of the topic.</td>
</tr>
<tr>
<td>1</td>
<td>The &quot;1&quot; response reflects a weak knowledge and understanding of the subject matter.</td>
</tr>
<tr>
<td></td>
<td>• The purpose of the assignment is not achieved.</td>
</tr>
<tr>
<td></td>
<td>• There is little or no appropriate or accurate application of subject matter knowledge.</td>
</tr>
<tr>
<td></td>
<td>• The supporting evidence, if present, is weak; there are few or no relevant examples.</td>
</tr>
<tr>
<td></td>
<td>• The response reflects little or no reasoning about or understanding of the topic.</td>
</tr>
<tr>
<td>U</td>
<td>The response is unrelated to the assigned topic, illegible, primarily in a language other than English, not of sufficient length to score, or merely a repetition of the assignment.</td>
</tr>
<tr>
<td>B</td>
<td>There is no response to the assignment.</td>
</tr>
