Course: Mat 221: Calculus II
Room: SB 306A
Schedule: TR 9:00 - 10:40
Instructor: L. Pedro Poitevin, Assistant Professor
Office: Sullivan Building 308B
Office hours: MWF: 1-3; TuTh: 12:30 - 1:30
Phone number: (978) 542-6995
e-Mail: lpoitevin@salemstate.edu

Course description: This course is a further development of the calculus of functions of one variable.

Course goals:

1. To provide students a thorough introduction to topics from calculus;
2. To illustrate the uses of calculus in applications.

Learning objectives: A student who passes this course should be able to:

1. Define definite integrals;
2. Find the area of regions bounded by curves;
3. Use exponentials and logarithms in applications;
4. Calculate integrals expertly;
5. Understand numerical integration;
6. Investigate the convergence of sequences, series, and improper integrals;
7. Calculate Taylor and Maclaurin series of functions;
8. Estimate errors for Taylor series.

Attendance policy: An advance notice for an absence to class is typically an e-mail sent to me 12 hours or more in advance of the class meeting the student will not attend. Permission for absence is typically an e-mail from me to the student to acknowledge receipt of an advance notice. Excused absences are absences for which I have advance notice, and for which the student has a permission for absence. Excused absences, if not excessive in number, will not negatively affect a student’s grade. An unexcused absence during a day when an assignment, quiz, or exam is due will result in a grade of zero for the assignment, quiz, or exam. Initially, I will not take attendance, but this may change if desirable. I
reserve the right to penalize students with more than three unexcused absences by reducing their final grade by one letter grade or more. In the event that I wish to exercise this right, notice will be given to students in advance. The student is responsible for completing all course requirements and for keeping up with all that goes on in the course (whether or not the student is in attendance).

**Textbook:** Thomas, *Calculus: Early Transcendentals, part one*, Pearson Education, Inc. (Required)

**Class format:** These lectures will follow an “active learning” approach. A fraction of class time will be devoted to lectures, and the rest to class work. Lectures will help you understand some of the finer points of the subject matter. Class work will allow you to gauge your understanding of calculus in the company of peers who will help you through the learning process. It will also give you an opportunity to explain to others what you have learned, which is a very effective way of solidifying one’s understanding in general. During class work, I will oversee your work and provide helpful hints. As a further element of your active participation in this class, you will often be asked to spend a minute responding to a short feedback question at the end of the lecture. I will listen and respond to this feedback.

**Exams:** There will be three exams: two midterms and a final. Each midterm will count for 20% of the course grade. The final will count for 30% of the course grade. The exams are scheduled as follows:

- Midterm I  Tentatively Tuesday, October 17 (in class)
- Midterm II  Tentatively Tuesday, December 7 (in class)
- Final  Tuesday, December 19 8:00 - 10:00

**Quizzes:** There will be quizzes every week. At the end of the semester, I will drop the lowest quiz score and compute the average of the remaining scores to account for 20% of the student’s final grade. Quizzes will be based closely on the assigned worksheets.

**Worksheets:** Worksheets will be assigned every week but not collected. Worksheet problems—many of them taken from the book—will show up frequently in quizzes. Often we will spend a significant portion of class time solving problems from the worksheets in small groups.

**Participation:** Because worksheets and group work will play an important role in this class, participation will play a role in calculating students’ grades. Students who consistently ask questions and offer help will get full marks. Participation accounts for 10% of the student’s final grade.

**Statement on Equality of Access:** Salem State College is committed to providing equal access to educational experience for all students in compliance with Section 504 of The Rehabilitation Act and The Americans with Disabilities Act and to providing all reasonable academic accommodations, aids and adjustments. Any student who has a documented disability should speak with the instructor immediately. Students with disabilities who have not previously done so should provide documentation to and schedule an appointment with the Office for Students with Disabilities and obtain appropriate services.
